

OUR STEEL CAN HELP YOU EARN
LEED[®] CREDITS.
OUR FULL RESOURCES WILL HELP YOU
BUILD SMART.

**STRONGER
THAN STEEL.SM**

ClarkDietrich is known as an established manufacturer of extensively tested, code-compliant steel framing products. Our reputation today, however, is being built on strong ideas. On a nationwide scale, we not only provide products that perform as a system, but also those that support your efforts to achieve sustainable goals, such as LEED certification.

ClarkDietrich.
BUILDING SYSTEMS

Interior Framing · Exterior Framing · Interior Finishing · Clips/Connectors · Metal Lath/Accessories · Engineering

Qualify for up to 7 LEED® credits with products from ClarkDietrich.

ClarkDietrich is working on many fronts to be a partner you can count on when it comes to building sustainably. We're proud, in fact, to be an active member of the U.S. Green Building Council with LEED-accredited professionals on staff. We can supply you with a number of products that can help you earn LEED credits, including our ProSTUD® Drywall Framing System, Red Header RO™, and MaxTrak® Slotted Deflection Track.

These products deliver green advantages in several ways. ClarkDietrich products are manufactured from cold-formed steel—which is 100% recyclable. They contain both pre- and post-consumer recycled content. And, due to our nationwide manufacturing locations, our products are often within a 500 mile radius of your project. For these and other reasons, our products can help your project qualify for up to 7 LEED Credits under Construction and Major Renovations (LEED NC Ver. 2.2 and 3.0). These include:

- **LEED Credit MR 2**
Construction Waste Management
- **LEED Credit MR 4**
Recycled Content
- **LEED Credit MR 5**
Regional Materials

We're working to bring change to the entire building landscape.

Regardless of size or complexity, ClarkDietrich is ready to help you rise to the challenges of any project. We begin by offering you access to a product line unsurpassed in its breadth, depth and nationwide availability. Yet, to meet the demands for higher performance in all aspects of today's buildings, more and more customers are turning to our BIM tools and digital resources, as well as our expert engineering services team.
