The Foundation of the Wall and Ceiling Industry is a nonprofit organization dedicated to education and research.

In the years since our formation, the Foundation has built programs from the ground up. We operate a unique technical library dedicated to the wall and ceiling industry. We administer a scholarship program to ensure excellence in industry education. We produce technical guides.

**The John H. Hampshire Memorial Research and Reference Library**

The Hampshire Memorial Library contains current and historical technical data, including: industry specifications, regulations and model building codes; technical reports; manufacturers catalogs; and books on contract law, estimating, construction management, and more! Materials are available for 30-day loans (fire, except postage).

To ensure that research questions receive immediate attention, the library has established an information hotline: 703 548-0374. Call this number for assistance with your industry research.

**Annual Scholarship Awards**

Through our scholarship program, the Foundation is preparing for the future by educating the students who will be tomorrow’s industry professionals. Each year we award 15 scholarships to students pursuing construction-related careers. Winners are selected on the basis of academic performance, work experience, financial need, and a demonstrated interest in an industry career.

**Comprehensive Technical Publications and Audio-Visual Materials**

The Foundation publishes technical documents to ensure that valuable research results can benefit the public. The following publications are currently under development: a manual of industry tolerances and a comprehensive document on fire-rated portland cement-based plaster wall assemblies.

Recent releases include a 17-minute video entitled, “Curtain Wall Construction.” The video, which explains the concepts of lightweight steel framing and panelization, was developed by the Foundation to provide vivid illustrations of how curtain walls can provide building owners with an economic yet beautiful building.

Another recent Foundation publication is the second edition of Technical Manual 12-A, the Standard Practice for the Testing and Inspection of Fire Applied Sprayed Fire-Resistive Materials: An Annual Guide which was developed by AWCI’s Technical Subcommittee Number 4.

Recognizing the numerous opportunities to improve our industry, the Foundation is dedicated to the expansion of our services to the public. To carry out this important work, we rely on contributions from industry professionals. Because the Foundation is designated a 501(c)(3) nonprofit under the US Tax Code, these contributions are considered charitable, tax deductible donations.

For a free library catalog, or for further information about Foundation publications and other services, call 703-684-2924, or write: FWCI, 1600 Cameron Street, Alexandria, VA 22314-2705.
