

GENERAL NOTES:

1. Detail is from **USG Gypsum Construction Handbook**.
2. Detail intended for interior nonstructural applications.
3. Steel stud is attached to exterior, and gypsum panels are attached to the next interior stud.
4. Metal trim and sealant is required.
5. Stud depth, spacing and thickness based on height of wall and design load. Consult **SFIA Technical Guide for Cold-Formed Steel Framing Products** for limiting heights.
6. Tape and finish inside corner with appropriate joint finish system.
7. Gypsum panel type and thickness as required to meet design considerations.

DISCLAIMER: This detail must not be used without a complete evaluation by the owner's design professional to verify validity of the design.
